DyChem Texprocess Show is the recent addition to the slew of trade events under the Textile Fairs India umbrella. Needless to say, it is emerging as an important platform where manufacturers and suppliers of the entire range of dyes, chemicals, processes, solution providers, and technology use to showcase their innovations driven by sustainability.

DyChem Texprocess Show will open avenues for interaction and networking with stakeholders of the textile value chain, facilitate the display of a comprehensive approach to chemical solutions, and present future-oriented innovations for the international apparel manufacturing and textile processing sectors. Besides, the event will provide insight into a wide range of application areas across all kinds of dyes and chemicals used in the textile and apparel sectors.

If you are a manufacturer, supplier, or service provider of textile dyes – reactive, disperse, sulphur, acid, alkaline, vat, direct, cationic, oil-soluble, pigments, printing paste, printing inks, auxiliaries, intermediates, pre-treatment and finishing agents, chemicals, bio-enzymes, and service providers of dyeing, printing, and fabric processing, the DyChem Texprocess Show is the ideal event to reach your targeted buyers.
