

A large, flowing orange fabric sculpture is the central focus of the image. The fabric is draped and gathered, creating a sense of movement and texture. It is set against a smooth, light-to-dark grey gradient background. The lighting highlights the folds and creases of the fabric, giving it a three-dimensional appearance.

TexIndia is a premier event that is eagerly awaited by textile enthusiasts and professionals worldwide.

The show brings together the manufacturers and suppliers of fabrics & accessories from different parts of the world to showcase their products and exchange ideas. This helps in promoting business opportunities and fostering collaborations between industry players.

Also contract manufacturing companies and job workers will be exhibiting their services for the knitting and garmenting community, fulfilling a long lasting need to integrate this vital segment of the value chain. The exhibition is focused on highlighting the knitted, woven, printed fabrics, accessories and other innovative textile applications that are emerging in the market.
