Trims & Accessories: From Afterthought to Fashion Frontliner

Insights from Ms. Nishi Vora, Director - Fashion Accessories India Pvt. Ltd.

Once seen as the last item on a garment checklist, trims and accessories have quietly evolved into some of the most dynamic, design-led elements in fashion today. From signature buttons and metal accents to personalized heat transfer labels, trims now shape a garment's personality, value, and consumer appeal.

At the forefront of this transformation is **Ms. Nishi Vora**, a marketing and fashion leader who has spent over a decade championing trims as not just functional elements, but as powerful tools for brand identity and consumer connection.

Beyond the Basics: The Rise of Trims in Modern Fashion

What role do you think trims play now in shaping a garment's appeal and identity?

NV: Customers today are increasingly demanding value in the products they buy. With fabrics becoming more expensive and often looking similar across brands, the easiest way for a brand to stand out is by investing in high-quality trims and embellishments that catch the consumer's eye.

While trims have always played a crucial functional role, they are now equally important in attracting attention, whether on the shop floor or online. They also offer brands an easy route to personalization, something as simple as a heat transfer label fused onto a T-shirt can make the product feel unique and personalized.

Global Competitiveness: India's Edge

Among design innovation, lead time, trends, compliance, and cost - what gives Indian trim manufacturers a competitive edge globally?

Navigating a Design-Led Industry Shift

India's apparel industry is becoming more design and trend-driven. How is this shift impacting the trims and accessories segment?

NV: As India's apparel industry pivots from an order-driven model to one centered on design and trends, the trims and accessories segment is undergoing rapid transformation:

- Customization has surged: Trim manufacturers now help brands stand out through unique on-garment differentiation, such as embellishments, materials, and colour accents.
- Faster product cycles: The rise of fast fashion and D2C brands has driven demand for agile production of smaller, highly customized trim batches to match rapid trend shifts.
- Design-led innovation: We actively collaborate with designers and brands on their seasonal collections, as trims are being used to elevate garment aesthetics and sometimes serve as key design elements.
- Sustainability is now expected: Recycled materials and low-waste production processes have become standard, driven by eco-conscious brands and consumers.
- Trim suppliers are strategic partners: Manufacturers are repositioning as value-adding innovation partners, offering trend insights, design collaboration, and flexible, small-lot production instead of bulk, order-based sourcing.

NV: I believe it's speed, technical know-how, and adaptability. Many of India's trim manufacturers are legacy businesses, combining decades of technical expertise with a younger generation focused on innovation, professionalism, and sustainability.

That combination allows Indian manufacturers to meet, and often exceed, global standards without losing the agility and service mindset that make them valuable partners.

Product Portfolio and Innovation Strategy

What are the key product categories gaining focus in trims today, and how do you balance innovation with product diversity and quality?

NV: Today, trims span all key categories—design, functionality, and branding. Metal trims are especially prominent and have become signature elements for many major Indian brands. There is strong focus on trend research and frequent collection launches to stay ahead of seasonal shifts.

Balancing innovation with diversity and quality means constantly exploring new materials, finishes, and designs while ensuring consistent production standards. The goal is to provide brands with a complete, design-led trim solution that elevates their garments and keeps pace with fast-changing fashion demands.

The FAIPL Journey: Building a Design-Led, Sustainable Brand

You've been at the helm of FAIPL's marketing and growth for over a decade. What has this journey been like for you personally and professionally, and how has your vision evolved?

NV: When I started, trims were largely treated as an afterthought—a commodity decision made at the last minute. Over the years, we've worked hard to shift that perception. At FAIPL, we've evolved into a design-led trims and accessories company, driven by research into global fashion trends and incorporating those insights into every collection.

There was a time when brands believed high-quality, design-forward trims could only come from countries like China or Turkey. We take great pride in changing that narrative. Today, we deliver better design and quality, all proudly Made in India.

On a personal level, I've always been passionate about design, but I've also felt the need for a more collaborative industry ecosystem. While India has many capable trim manufacturers, the industry has historically functioned in silos. One of my core missions has been to bring this ecosystem together and position trims as essential to the fashion supply chain, not a footnote. I can see that shift happening now, and it's incredibly rewarding.

Values Driving the Trims Industry Forward

What values or principles are essential when leading teams and making decisions in this space?

NV: Integrity and Accountability: Every decision and client interaction should be rooted in transparency and ethical conduct. Teams perform best with a culture of ownership.

Excellence and Quality Focus: From sourcing raw materials to final product checks, maintaining high standards of quality is non-negotiable.

Innovation and Continuous Improvement: Fostering a culture of experimentation is key—whether working with better materials, streamlining workflows, or developing trend-led designs.

Collaboration and Partnerships: Growth happens through meaningful relationships with designers, suppliers, artisans, or customers.

Sustainability and Responsible Operations: Environmental and social responsibility must be integrated into all aspects of the business—from using eco-friendly materials to adopting paperless systems and prioritizing worker welfare.

Sustainability in Trim Manufacturing

Sustainability is a recurring theme in your journey. What actions are being taken toward sustainable trim manufacturing?

NV: Sustainability in trims is now a core expectation. The industry is gradually moving away from resource-intensive processes like electroplating, which consume large amounts of water, electricity, and chemicals, and exploring alternative materials and finishes that are safer and cleaner.

Recycled metals are now widely used, often processed in-house or sourced through trusted supply chains. There is also growing interest in lace and fabric trims made from recycled fibres, as demand for low-impact embellishments increases. Sustainability efforts extend beyond materials, operations are evolving too. More manufacturers are going paperless, investing in renewable energy, and setting up systems like effluent treatment plants to manage waste responsibly.

Ultimately, sustainability in trims must be integrated into every stage of design, sourcing, and production—not just as a compliance requirement, but as a mindset.

Insights for Future Entrepreneurs

What advice would you give to young entrepreneurs entering the trims and accessories space?

NV: Believe in the product. A trim is not just a piece of metal, plastic, or fabric, it is part of the brand's identity. Stay ahead of trends, deliver high design value, and never compromise on quality. Indian buyers are informed and expect global standards, so bring your A-game every time.

Also, this business is built on relationships and learning. Value the experience of industry veterans and build networks that support growth. That foundation will be your biggest asset over time.

In today's fashion ecosystem, trims are no longer supporting players; they are leading characters in the story of a garment. With leaders like **Ms. Nishi Vora**, the Indian trims industry is not only keeping pace with global trends but setting some of its own.

Tirupur Gears Up to Host South India's Most Comprehensive Textile Sourcing Show
Celebrating 16 Years of Yarnex's Legacy in India's Knitwear Capital | 25–27 September 2025 | IKF Complex

The four shows - **Yarnex**, **TexIndia**, **Apparel Sourcing Fair** and **DyChem Texprocess** are all set to take place in Tirupur, the country's knitwear powerhouse, from **25th to 27th September, 2025** at the **IKF Complex**. This edition marks 16 years since **Yarnex** first launched in Tirupur, building a legacy of innovation, industry expertise, and sourcing opportunities for the vibrant textile and apparel ecosystem.

Yarnex was first launched in Tirupur in 2009 to enable manufacturers who primarily worked with cotton to explore and source other raw materials and specialty textiles. Over the years, Yarnex has played a crucial role in bridging this sourcing gap, serving as a vital connector that enables manufacturers to broaden capabilities, explore new product categories, and stay globally competitive. By bringing diverse suppliers and solutions under one roof, the show has significantly reduced the lead times, helping manufacturers respond faster to market demands.

Organised by **S S Textile Media Pvt. Ltd.**, with over **22** years of focused experience in building meaningful platforms that serve every tier of the textile industry, the event will host four concurrent shows representing the entire value chain: **Yarnex - India International Yarn Exhibition**, featuring fibres, cotton, polyester, viscose, blended, fancy, melange, functional, recycled, and organic yarns; **TexIndia - Textile Sourcing Fair**, featuring knitted and woven fabrics, sustainable and technical textiles; **DyChem Texprocess**, covering textile chemicals, dyes, auxiliaries, and sustainable processing agents; and **ASF - Apparel Sourcing Fair**, launching in Tirupur for the first time, presenting garments, fashion accessories, and private-label/OEM manufacturing services. Together, these shows create a single comprehensive platform, bridging upstream raw materials to finished apparels under one roof.

Tirupur, India's knitwear capital, offers a strategic location for this sourcing-focused exhibition, providing manufacturers, exporters, and buyers direct access to the heart of India's apparel production base. With **319** exhibitors, the event presents a vast showcase of products and innovations. Visitors to the show include buying houses, exporters, manufacturers, importers, apparel brands, garment manufacturers and exporters, private-label manufacturers, liaison offices, retailers, fashion designers, wholesalers, distributors, and sourcing agents from across India and several other countries.

The show will be inaugurated on **Thursday, 25th September, 2025**, by Chief Guest **Padma Shri Dr. A. Sakthivel**, **Chairman of the Apparel Made-Ups & Home Furnishing Sector Skill Council**, and Guests of Honour **Mr. Shantanu Singh**, **Sourcing Operations Lead (South Asia) at C&A Sourcing**, and **Ms. Shilpi Tiwari**, **Country Head of Pepco Global Sourcing India**, along with industry stalwarts.

A major highlight of this year's event will be the introduction of the **TFI Trend Forum**. This curated showcase will feature innovative fabrics, trending textures, seasonal colours, and the latest in sustainable and circular textile developments. Designed to offer directional insights, the forum will be a must-visit for fashion and sourcing teams looking to align with both Indian and global fashion movements. Another highlight will be the **TFI Prism Awards** celebrating innovation and excellence across product categories. Winners will be selected by a panel of top Textile Technocrats, with visitor voting also contributing to the final outcome. The awards aim to spotlight the creativity, technical advancement, and forward-thinking solutions of top exhibitors.

Award categories include: Innovative Fibres & Yarns, Woven Fabrics, Knitted Fabrics, Most Sustainable Product, Novelty Fabrics, and Trims & Accessories.

Insights from last year's edition reaffirm the show's growing significance. The then Chief Guest, **Padma Shri Dr. A. Sakthivel** (Chairman of the Apparel Made-ups & Home Furnishing Sector Skill Council), remarked, "This show helps in the growth of Tirupur. These days, everyone is talking about sustainability and the event rightly focuses on eco-friendly products. There is no doubt that Tirupur's exports will grow more and more through this platform." This year's edition is not just about sourcing, it's about building deeper supplier relationships, gaining insights into sustainable innovation, and creating new market linkages in a fast-evolving global textile landscape.

Discover What's Next at the TFI Trend Forum

**A preview of the future,
through colours, textures, and innovation**

Step into the world of tomorrow at the TFI Trend Forum, happening at Yarnex - Tirupur Edition. This specially curated space is where you can explore the ideas, colours, materials, and innovations that are set to define the next fashion seasons - Autumn/Winter 2026 and Spring/Summer 2027.

Whether you're a designer, buyer, or innovation enthusiast, the Trend Forum offers a fresh take on how creativity, technology, and sustainability are coming together to reshape the textile industry.

Colours That Reflect the Mood of Tomorrow

One of the most exciting highlights is the colour forecast, which gives a clear glimpse into the mood and emotions driving future collections. For Spring/Summer 2027, the palette is full of clarity and energy, as predicted by WGSN and Coloro, who continue to shape global colour direction. The spotlight is on Luminous Blue, named the Colour of the Year 2027. It represents calmness, digital progress, and a hopeful future. It's supported by cheerful and lively shades like Pop Pink and Energy Orange, which add vibrancy and fun. These are balanced by nature-inspired tones like Meadowland Green, bringing a sense of peace and renewal, and Clay, a warm, earthy neutral that adds simplicity and comfort.

Looking ahead to Autumn/Winter 2026, the colours become richer and more emotional. Shades like Transformative Teal and warm terracottas reflect a growing interest in comfort, nostalgia, and inner growth. These deeper tones show a desire to slow down, reconnect with nature, and focus on what really matters.

Prints That Speak Volumes

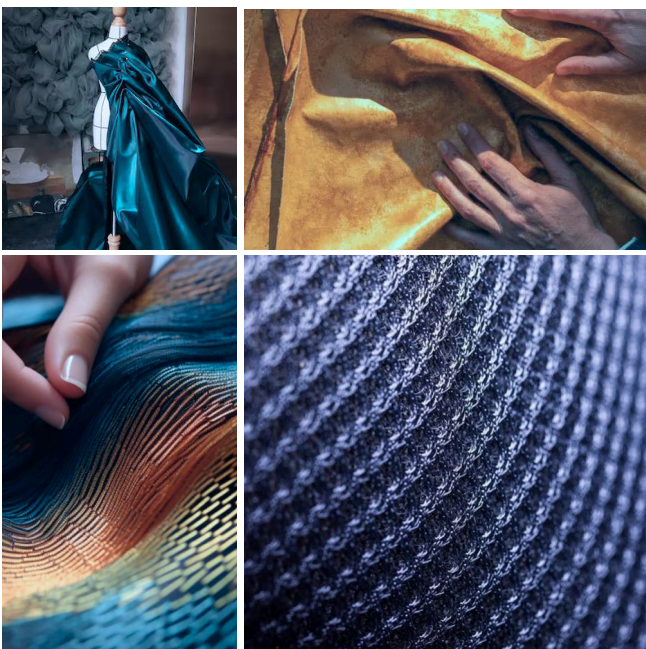

From oversized botanicals to soft abstract geometrics and tone-on-tone designs, there's a noticeable shift toward artistic expression that still feels accessible and wearable. This season's prints celebrate creativity without compromising on versatility, allowing garments to stand out while remaining easy to style. Many designs merge vintage influences such as retro florals or classic motifs with a clean, modern edge, resulting in patterns that feel both nostalgic and contemporary. The overall mood is one of intentional individuality, appealing to consumers who seek subtle statement pieces that balance personality, simplicity, and timeless appeal.

Sustainability That's Here to Stay

Sustainability is now embedded into every stage of design and production. Innovations like lab-grown fibres, mycelium-based leather, seaweed-derived cellulose, and zero-waste dyeing techniques are transforming how the industry thinks about impact. These aren't distant ideals—they're available now and increasingly adopted by brands prioritizing traceability, circularity, and long-term value.

Material Innovation: Where Function Meets Future

Textile innovation is accelerating with advancements that merge performance, aesthetics, and sustainability.

Source: <https://images.app.goo.gl/sxDkn2rzvMeB89hu7>

source: <https://in.pinterest.com/>

AI-powered fabric sorting systems, sensor-embedded textiles, and graphene-infused materials are reshaping how fabrics are made and how they perform.

Eco-conscious fibres are also taking center stage - Tencel, recycled polyester, hemp blends, and organic cotton are becoming go-to materials, especially in knits. Tactile surfaces are in demand, with slub, bouclé, and nubby finishes offering a handcrafted, textured appeal. 3D knits are rising as a category, combining structure with softness and versatility.

An Immersive Experience of What's Next

These forward-thinking colour directions, prints, materials, and sustainability innovations come together in one place - The TFI Trend Forum is brought to life through a rich mix of fabric swatches, inspirational trend boards, digital storytelling, and a 360° panoptic fabric showcase. This immersive setup lets visitors see, touch, and explore trends from every angle, making it a space not just to observe, but to interact and be inspired.

Whether you're looking for your next big design idea, exploring material choices, searching for innovation, or leading sustainability efforts, the TFI Trend Forum is your launchpad. It's more than a display, it's a starting point for what's next.

 Yarn 150D

Composition: Polyester / Metallic
Yarn Count / Yarn Ply: 150D, Low Twisted
Application: Sewing, Knitting, Hand Knitting, Weaving, Embroidery.
Description with USP:
 Premium ST-Type metallic yarn offers brilliant luster and smooth finish for detailed embroidery and textile crafts. Engineered for bulk use with consistent quality and competitive pricing.

Texventures Pvt. Ltd., Mumbai
Product Name: Bambu Canem
 White/RFD Fabric

Composition: Hemp 55% / Bamboo 45%
Type: Woven **Width range:** 57–58 inch
Weave: Plain **Weight (GSM):** 170–180
Application: Shirts, tops, ethnic wear, dresses, accessories, home furnishing.
Description with USP:
 A breathable, heavier GSM fabric that blends the antibacterial strength of hemp with the ultra-soft comfort of bamboo.

Sutlej Textiles and Industries Ltd, Mumbai
Product Name: Polyester Triumph
 Fabric

Composition: 100% Polyester
Type: Woven
Weave: Plain **Weight (GSM):** 350
Application: Home Furnishing.
Description with USP:
 Triumph offers a soft hand feel with a natural linen look and rich texture. Its elegant drape and durability make it ideal for premium home furnishings.

Top Light Trims Pvt. Ltd., Tirupur
Product Name: Woven
 Merrowing Badges

Composition: Oeko Tex Certified Polyester Yarn
Type: Woven Badge / Label
Application: Apparels and Bags.
Description with USP:
 Durable and finely detailed, these woven badges with merrowed edges offer a premium finish for branding. Made with Oeko Tex certified yarn, they ensure both quality and eco-compliance.

Trident Limited, Ludhiana
Product Name: Smart Temperature
 Regulating Fabric

Composition: Cotton / Viscose from Bamboo

Weave: Satin **Type:** Woven

Application: Apparel, Active Wear, Performance Wear.

Description with USP:

This satin weave fabric blends cotton and bamboo viscose for smart temperature regulation and superior breathability. Ideal for comfortable, eco-friendly performance and everyday wear.

Varsidhi Textiles (P) Ltd., Tirupur
Product Name: Blue Over Dyed
 Single Jersey Fabric

Composition: 60% Recycled Cotton / 40% Polyester

Type: Knitted

Weave: Single Jersey **Weight (GSM):** 135

Application: Casual Wear, T-shirts, Sustainable Apparel.

Description with USP:

This eco-friendly single jersey fabric features blue over-dyed yarns on a white base, blending sustainability with vibrant style.

Tryloop Fabrics, Surat
Product Name: Stretch Fabric
 with Spandex

TRYLOOP FABRICS

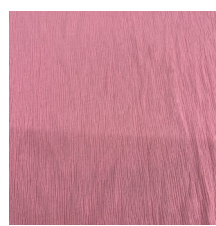

Composition: 98% Cotton / 2% Spandex

Weight (GSM): 230

Application: T-shirts, Active Wear, Bottom Wear.

Description with USP:

This stretch fabric combines comfort and flexibility with 2% spandex for superior movement and recovery. Ideal for form-fitting garments, it offers excellent shape retention and a soft cotton-rich feel.

Vidya Enterprises, Ludhiana
Product Name: Self Textured
 Jacquard Fabric

Composition: 60/40 C/P **Type:** Knitted

Weave: Links-Links Jacquard

Weight (GSM): 240

Application: Men's Polo T-shirt, Women's Tops/ Dresses.

Description with USP:

Featuring a self-textured, crushed effect without spandex, this fabric offers stability and cost efficiency. Its soft feel and ideal thickness make it perfect for year-round wear.

**UNC Lifestyles/ Sansavin Fabrics
 and Apparels, Hong Kong**
Product Name:
 TPU HD Molding Sticker

Composition: TPU (Thermoplastic Polyurethane)
 HD Silicone Heat Transfer Sticker

Application: Heat transfer sticker for garments, sportswear, and accessories.

Description with USP:

This HD silicone heat transfer sticker offers a bold 3D effect with excellent durability and flexibility. Ideal for premium branding with a smooth finish and high-definition detail.

Yajur Fibres Limited, Kolkata

TEXTILE FAIRS INDIA

Integrating the
textile value chain

TFI Legacy Since 2004

As one of India's most trusted and largely connected textile exhibitions, TFI – Textile Fairs India has earned its place as a pioneer in the industry. With a legacy built on excellence, TFI connects the global textile ecosystem through innovation, networking, and sustainability.

Bringing together manufacturers, buyers, and professionals from across the globe, TFI offers a dynamic platform for sourcing, collaboration, and business development. With exhibitions in diverse product categories ranging from fibers, yarns, and fabrics to apparel, home textiles, digital printing, and functional textiles, TFI is where the entire value chain converges.

Sustainability

With a strong emphasis on eco-conscious practices, TFI highlights sustainable materials, ethical production, and green innovation. It inspires the industry to evolve responsibly and promotes a cleaner, greener textile future.

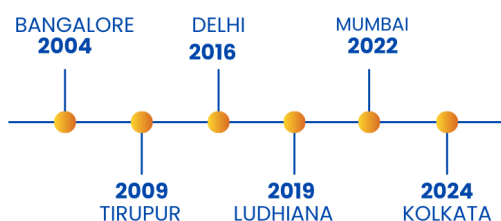

Network

TFI is more than an exhibition—it's a thriving community. It brings together decision-makers, innovators, and thought leaders, creating opportunities for impactful partnerships and strategic collaboration.

Innovation

TFI is at the forefront of progress—showcasing the latest breakthroughs in textile technology, materials, and design. It empowers attendees to stay ahead of market trends and adopt forward-thinking solutions.

Chronology of Events

WHETHER YOU'RE SOURCING, SCALING, OR SIMPLY
STAYING INSPIRED
TFI IS YOUR GATEWAY TO WHAT'S NEXT
