Discover Textiles with TFI

Extravagant shows, exquisite dates, 6 cities!

TFI brings the best in fibres, yarns, fabrics, accessories, dyes and home textiles under one roof

**9, 10, 11 May 2024,
 Bombay Exhibition Centre,
 Mumbai**

Conceived and launched in 2004 in Bangalore, Textile Fairs India has come a long way, entrenching itself as a brand and a vital cog in the sourcing and business networking cycle for the textile value chain. These shows are successfully serving the textile value chain for almost two decades in India. The 30th Edition of Yarnex, 31st Edition of F&A Show and 3rd Edition of Homtex 4th Edition of DyChem is scheduled on 9, 10, 11 May 2024 (Thu, Fri, Sat) at Hall No. 3, Bombay Exhibition Centre, Mumbai.

The four shows will bring under one roof manufacturers and suppliers of Fibres, Yarns, Apparel Fabrics, Trims, Embellishments, Home Textiles, and related services to showcase their merchandise to discerning buyers from India and overseas.

A whopping 130 exhibitors from across product categories Fibres, Yarns, Fabrics (Handloom, Powerloom & Mill Made), Accessories, Home Textiles, Dyes & Chemicals and Supporting Services.

Visitors to the fair will include serious decision makers from India and overseas who represent International Buying Houses & Agents, Liaison Offices, Garment Manufacturers & Exporters, Apparel Brands, Fashion Labels, Composite Mills, Powerloom Weavers, Knitters, Importers, Fashion Designers, Merchant Exporters, Large-Format Retail Chains, Multi Brand Outlets, E-commerce Retailers, Departmental Stores, Specialty Stores, Hyper Markets, Specialty Retailers, Traditional Stores, Online Retailers, Sourcing Agents, Wholesalers, Distributors & Trade Body Representatives.

With the excitement surrounding the show preparations, it seems to soon be a hit. Organised by S S Textile Media Pvt. Ltd., the upcoming shows are all set to be as successful as its predecessors.

F&A Show and ASF successfully concluded in Bangalore

The **F&A - Fabric and Accessories Show** and the **ASF - Apparel Sourcing Fair** have come a long way and have entrenched their place in the sourcing and business networking cycle for the textile value chain. The F&A Trade Show has been serving the textile supply chain for the last 20 years in Bangalore.

The annually organised twin trade shows - **F&A Show** and the **ASF Fair** were organised on 20, 21, 22 March 2024 at Trade Centre, KTPO, Whitefield, Bengaluru. It was inaugurated by **Mr. Sarbajit Ghose, Asia executive Director, CIEL Textiles and Managing Director, Laguna Clothing, Bengaluru.**

The 3 days concluded with extravagant displays and groundbreaking innovations from 112 manufacturers and suppliers from India's leading textile brands and companies. The various categories of merchandise on display were yarns, fabrics, trims, embellishments, apparels and fashion accessories. The exhibitors observed numerous potential buyers visiting their kiosks. The atmosphere was truly one of its kind and filled with exuberance, knowledge, networking and sourcing.

The 30th edition of the **F&A Show** and the 4th edition of the **ASF Fair** observed representatives from big fashion brands, labels, designers, sourcing managers, heads of departments, export houses, import houses and fashion entrepreneurs beginning their journey in the field.

The key highlights of the trade show included forerunners of the industry showcasing their pioneering innovations in sustainable textiles in the categories of yarns, fabrics and apparel, each adhering to the UN SDG (United Nations Sustainable Development Goals). The exhibitors as well as the visitors were satisfied with the trade show, having met and found their purpose for visiting.

“Innovation at SVG is an everyday process”

**Mr. Rajkumar Agarwal,
Managing Director, SVG Fashions Pvt. Ltd., & Raj Rayon Industries Ltd.**

Established in 1984 by Mr. Satyanarayan Agarwal as a composite unit comprising weaving & processing, Shree Venkateshwar Group (SVG) has grown to become a vertically & laterally integrated textile manufacturer known as SVG Fashions Pvt. Ltd. They have stayed true to their vision of converting “fibre to fashion” and are proud to be a one-stop solution for all textile needs right from textured yarns to stitched garments. They offer end to end product services from yarn spinning to fabric weaving and garment manufacturing - all under one roof. Specialising in polyester knit and woven fabric, they have shaped themselves to be one of the leading garment manufacturers in the nation.

Having participated in the F&A show for 2 editions now, Mr. Rajkumar Agarwal, Managing Director, SVG Fashions Pvt. Ltd. and Raj Rayon Industries Ltd., shared his experience of procuring the contract with Adidas of the official world cup jerseys for the Indian cricket team during the Bangalore edition of F&A Show and ASF held on 20, 21, 22 March 2024 at Trade Centre, KTPO, Whitefield.

Mr. Rajkumar began by introducing themselves as an end to end solution provider with polyester yarn spinning to dyeing, knitting, printing and so much more all the way through garment manufacturing all under one roof. They believe in perfecting one skill rather than being imperfect in a hundred. This is also the reason they specialise only in polyester fabric - knitting and weaving. They have circular, flat and warp knitting machines along with weaving and embroidery happening simultaneously, aiding in the production of up to 50 kgs of fresh samples on a daily basis.

Their dedication to their product manufacturing, R&D, on-time deliveries, and stringent quality checks led them to collaborate with Adidas for the manufacturing of the official world cup jerseys for the Indian cricket team. “A truly proud moment for all at SVG!” says Mr. Rajkumar Agarwal. SVG has been Adidas India’s nominated vendor for polyester fabrics for the last 16 years. When the World Cup came in 2023, Adidas was keen to develop a new fabric for the jersey and the team at SVG made it happen. Their relentless focus on innovation & agile mindset helped them to manufacture record quantities in very less time.

He additionally expressed his joy regarding all the potential customers they met through the Tirupur fair and now Bangalore organised by S S Textile Media Private Limited. He was confident that he shall continue to meet more in the coming days as well. He further expressed the importance of trade shows, especially for SVG, saying “It increases the company’s visibility and one has to be there in the shows to have their presence felt in the industry and additionally also acquire a lot of potential customers. We too have met a lot of potential customers and have become their regular customers who swear by them!”

Upon asking about his opinion on how the market conditions have been fluctuating and what is his stand on the same, he responded saying “That it is all part of the game, that is bound to happen! One has to up their game. Keep on innovating and bringing new things to the market while staying up-to-date with the newest trends of the season”, said Mr Rajkumar Agarwal.

It is a major milestone to see Indian manufacturers thriving their way into meeting the quality and commitment of leading international brands and collaborating to make what's seemed to be impossible until now. A true accomplishment for the entire team at SVG Fashions Pvt. Ltd. under the guidance and supervision of Mr. Rajkumar Agarwal.

Korean Manufacturers Pave Their Way Into The Indian Markets. an applaudable and astounding feat!

Sealon Co., Ltd., Korea
Mr. Steve.Park (left),
Assistant Manager Sales Team
Mr. D.W. Lim (right),
Assistant Manager Marketing Team

The apparel industry frequently uses adhesive, seam sealing, and deco tapes to create water-repellent clothing, including windcheaters, raincoats, performance and safety gear for construction workers, and high-end fashion items. One such pioneer is the South Korean accessories company Sealon, which has been operating out of Seoul since 2002. Their revolutionary innovations and performance wear have led them to become pioneers in the fields of adhesive films, deco films, specialty tapes, and seam sealing tapes for clothing. Due to their environmentally friendly products, they are a well-known brand in the world of seam sealing. Their items range from recyclable and biodegradable products, which are environmentally friendly.

In conversation with Mr. Steve Park, Assistant Manager Sales Team and Mr. Dong Wook Lim, Assistant Manager Marketing Team from Sealon, Seoul, South Korea, who have participated in two F&A shows so far, share their experience and open up about their newest and groundbreaking innovations in deco films, along with their launch in India! Read on to know more about Sealon and the backbone behind their global success.

“We met the second largest company in this field and believe that the potential is enormous when one is entering the Indian market and hope to get some good feedback from the visitors.” says Mr. Dong Wook Lim when asked about the quality of visitors they came across. He goes on to discuss the distinctions between the present F&A Show and the one they attended in Delhi. In his opinion, the marketplaces in Delhi and Bangalore are very distinct from one another and each has enormous potential.

Having participated in trade shows globally as well, the duo share their views on how the trade shows add value to their company. “We came to understand the trends in the current Indian market and by meeting so many garment manufacturers, it helps us to better understand the requirements of the client. If there is a specific requirement from the client in India, then we can develop a product through our R&D.”, expressed Mr. Lim. “A lot of vendors inquired about our reflective tapes which are often used by workers who work at night and in darker environments.” shares Mr. Steve Park when prompted about their most asked about product on display.

The company just unveiled their newest product, 100% recyclable polyester-based deco films for clothing, in response to the growing global conversation and importance of sustainability. Talks on producing more sustainable products and obtaining more sustainable certifications are underway with their R&D team. One of their biggest features is that they use polyester, which is 100% recyclable and reused, unlike many firms that produce deco films, which use PU or hazardous chemicals that cannot be recycled to create these ornamented tapes. All phases are completed internally because they have a full end-to-end manufacturing and research and development centre in South Korea. In addition, they offer technical assistance by conducting textile tests on the materials that the client sends them, such as hydrostatic and washing tests, and sharing the test results with the client.

Sealon is a trustworthy and genuine pioneer in their industry because of their dependable processes and ethics. The way that India is opening its doors to foreign manufacturers and allowing multinational brands to enter the Indian market with sustainable values and ethical standards that foster enduring connections is truly remarkable. The company's work has genuinely demonstrated the enormous potential that Korean suppliers and manufacturers have in India.

Sustainable Seams: Weaving Vibes' Trailblazing Textile Innovation

Mr. Shripat Jagirdar, Founder, Weaving Vibes

Sustainability, a topic widely discussed and a paramount global concern, takes centre stage in

contemporary discourse. The textile industry, renowned for its extensive water usage and significant waste output, has prompted a wave of pioneering efforts in textile innovation. Among these innovators is Weaving Vibes, a Mumbai-based company specialising in hemp and bamboo fabric manufacturing. They produce and print eco-friendly fabrics for apparel, accessories, home furnishings and beyond. Delve into an enlightening conversation with Mr. Shripat Jagirdar, Founder of Weaving Vibes, as we explore the cutting-edge textile options offered by this esteemed brand.

"Our manufacturing unit is in Bhiwandi and it has a capacity of producing 2.5 lakh mts a month. It is an end-to end unit with fabric manufacturing, eco printing and packaging under one roof." says Mr. Shripat. Sustainability has a lot to do with traceability and transparency, so the company has an ethical policy of sharing the complete details of all the mills, production units, testing labs and everything else involved in the manufacturing of the fabric with the client. Through this, the client has complete knowledge of how and where the fabric is being processed.

"We manufacture for three industries - apparel (menswear, womenswear and kidswear), home furnishings (cushion covers, curtains, upholstery, etc.) and the accessory industry, which has backpacks, shopping bags, shoes and variations of those. The accessory industry is exploding with hemp, as we have a huge variety within just backpacks - from travel bags, ransacks, to school bags" discusses Mr. Shripat.

Every manufacturing unit has a certain MOQ (minimum order quantity); however, Weaving Vibes has no such policy and offers even 2 mts of fabric from their stock to new entrepreneurs, students and freshmen in the field of fashion and textiles to begin with. Setting them apart in the textile industry, not only through their innovative process of turning hemp and bamboo into wearable fabric but even through their ethical values set in place for enduring relationships.

Referring to the state of the market for their fabric, he said, "Hemp is in competition with linen because of the way it feels, looks and falls. Hemp is, however, softer, naturally UV resistant and retains colour better. The hemp industry is currently experiencing a boom in the export market, primarily for clothing, due to the stigma and reluctance associated with cannabis and marijuana in India.

But it is very different from that and we think Indian markets are moving in the direction of accepting it, so we think it has great potential here as well."

This was the first time that Weaving Vibes participated in the F&A Show in Bangalore, organised by S S Textile Media Pvt. Ltd. and they believe they should have participated in its previous editions as well. Having received an amazing response and met many potential buyers, Mr. Shripat believes the city is greatly inclined towards sustainability, making it a great market for their product. In a world where green innovation meets cultural apprehension, Weaving Vibes continues to thread the needle of progress, stitching a sustainable tomorrow.
